Android studio laravel login. Rest api laravel android studio.

In this article, we will see how send push notifications from Laravel app to iOS & Android apps using FCM (Firebase Cloud Messaging). Prerequisites: • A Laravel project • Firebase account • Create a new app in Firebase Step 1: Get fcm_token from Firebase Click on app settings icon then choose project settings Then from tabs go to Cloud Messaging and you will get the token there. Copy it. Step 2: Create Config file Now in your Laravel project go to Config directory & create a new file called fcm.php contains:
